

Shapely Plane studies

Mrs Ras

What do notice about the surface of this man's face? Is there a curved surface?

<https://www.mathsisfun.com/geometry/plane.html>

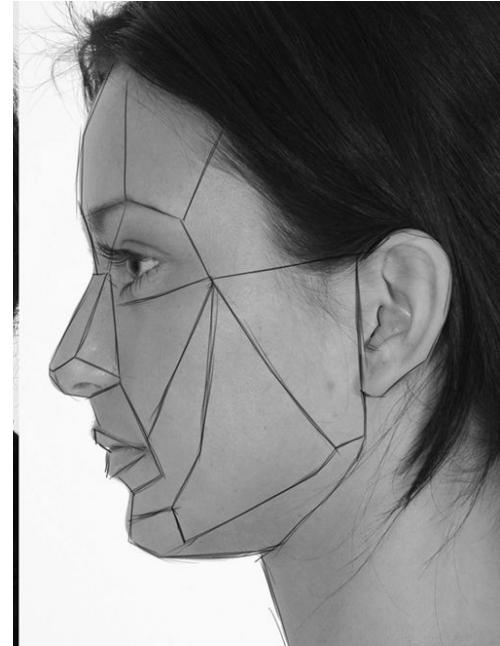

In geometry what is a plane?

How is the artist using planes to create volume ieThe sense of a three dimensional face?

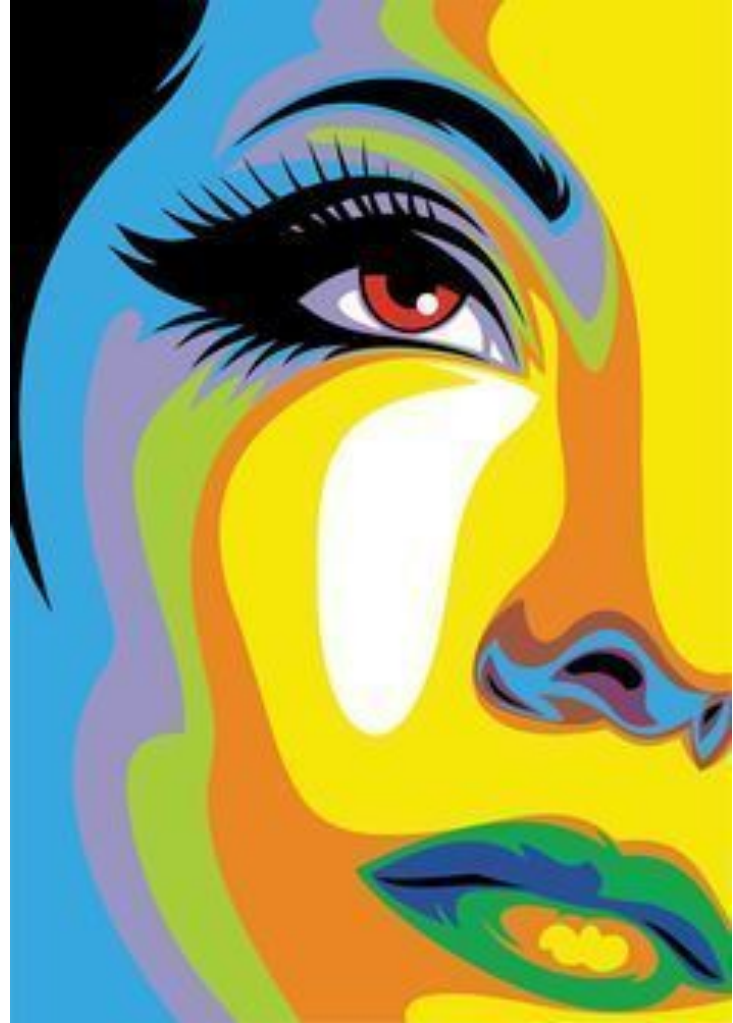

If i was to compose a form using just flat planes, what characteristic do you think i might use to determine where the planes go? Think about the art characteristics that help you create the illusion of volume?

What is organic shapes, what are geometric shapes.

How does this artist below construct the form using organic shapes.

Look at your sticker? Which shapes organic or geometric does it mostly resemble and why?
