

The Elements of Art

The building blocks of making art

<p>Line</p>		<p>A line is a path made by a moving point through space. It is one-dimensional and can vary in width, direction, and length.</p>
<p>Shape</p>		<p>Shapes are flat, enclosed areas that are two-dimensional (length and height). Artists use both geometric and organic shapes.</p>
<p>Color</p>		<p>Color is perceived by the way light reflects off a surface. There are three properties of color: hue (color name), intensity (strength/purity), and value (lightness and darkness).</p>
<p>Value</p>		<p>Value describes the lightness or darkness of a surface.</p>
<p>Texture</p>		<p>Texture describes the surface quality of an object. Artists use both actual texture (how things feel) and implied texture (how things look like they feel).</p>
<p>Space</p>		<p>Space is used to create the illusion of depth within an artwork. It can also refer to the positive and negative space between, around, or within objects.</p>
<p>Form</p>		<p>Forms are three-dimensional (length, width, height) and can be viewed from many angles. Forms have volume and take up space.</p>

The Art Elements Questions Do Now

1. What are element refers to creating something with length, height and width therefore giving the illusion of 3 dimensionality.
2. This art element is created by light. Creating different hues through the light spectrum. Three primary hues can create secondary hues and then tertiary hues.
3. What art element is a moving point? It can show direction and can create outlines.
4. Which art element reference the lighting of a piece of artwork. The highlights of a light source such as the sun and then lack of lighting called shadows.
5. This art element is the illusion of depth in a piece of art.
6. What are element can be described as a flat completely inclosed area? This element comes in two types both organic and geometric
7. What art element refers to the way something looks the way it might feel? Silky, smooth, rough etc.
