

# What do you see? Scientific Illustrations

Mrs Ras

1) In this picture what do you see? What information is being illustrated?

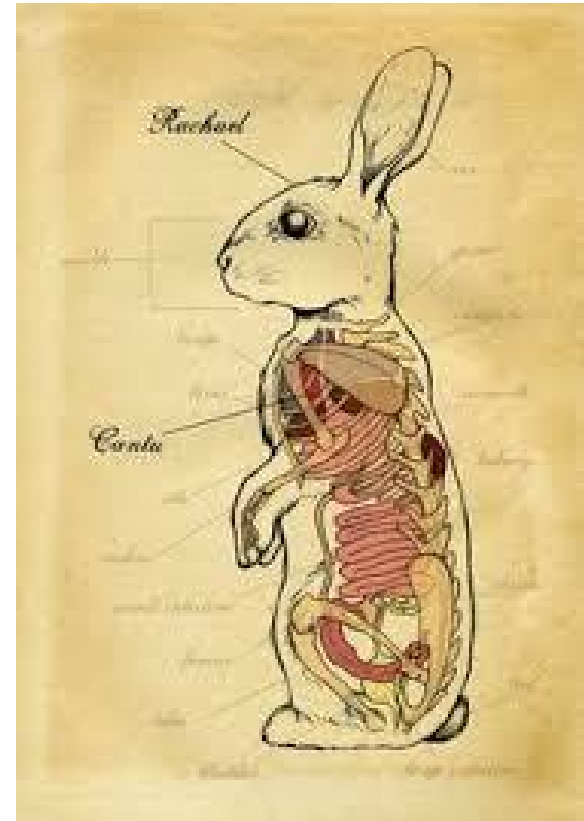

Scientific Illustrations is highly detailed and realistic art that depicts scientific information for example discoveries, about the natural world ie animals, plants bugs etc.

2)Why do you think these types of drawing were really important to doctors and scientists of the 1800s and before?

3) what do you see? What information is being illustrated? Whom might have benefited from an illustration such as this?

4) What do you learn about butterflies in this picture?

5) Why do you think being highly detailed and accurate was really important to this craft of Scientific Illustrations?

6) What do you see/learn about bee due to this artist's high detailed rendering of this bee? Look carefully what do you notice?
